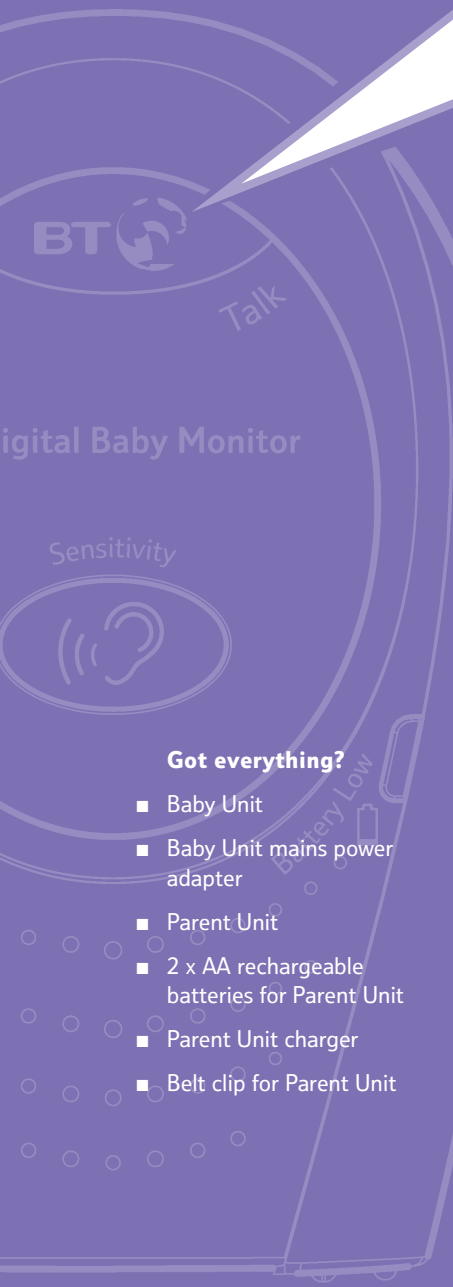
User Guide

BT DIGITAL BABY MONITOR

Welcome...

to your BT Digital Baby Monitor



- Digital sound quality lets you hear your baby breathe, gurgle, snuffle or cry with complete clarity.
- Wireless range of up to 300m outdoors and up to 50m indoors (in ideal conditions) - giving you the freedom to move around with clear reception and no interference from other baby monitors.
- Link light provides continuous confidence that the Parent Unit is receiving a signal from the Baby Unit and will alert you if the link is lost.
- Sound sensitive lights, so you can turn the volume down and still know when your baby stirs.
- Talk Back feature lets you instantly reassure and calm your baby.
- Nightlight for a soft, comforting glow.
- Mains or battery operation.

Got everything?

- Baby Unit
- Baby Unit mains power adapter
- Parent Unit
- 2 x AA rechargeable batteries for Parent Unit
- Parent Unit charger
- Belt clip for Parent Unit

This User Guide provides you with all the information you need to get the most from your BT Digital Baby Monitor. Please read this guide carefully and keep it for future reference.

Need help?

If you have any problems setting up or using your BT Digital Baby Monitor (or would like additional or replacement batteries), call the BT Baby Monitor Helpline **08702 40 47 45**. Lines open 9.00am–5.30pm, Monday to Friday and 9.00am–2.00pm on Saturday.

Alternatively, you may also find the answer in 'Help' at the back of this guide.

IMPORTANT

- Your BT Digital Baby Monitor is designed to be an aid and should not be used as a substitute for responsible and proper adult supervision.
- Make sure the Baby Unit and mains adapter cable are kept out of reach of your baby – at least one metre away.
- Never place the Baby Unit inside your baby's cot, bed or playpen.
- Never cover your Parent or Baby Units (e.g. with clothes, towels or blankets).
- Never use or place your Parent or Baby Units in moist places or near water.
- If travelling abroad, make sure that the voltage shown on the mains power adapter corresponds to the local mains power before connecting to the power supply.
- Always dispose of batteries in accordance with applicable waste disposal regulations, never in your household rubbish.

Setting up

Battery performance
The Parent Unit gives up to 16 hours continuous performance on fully charged batteries.

Please note however, that new batteries do not reach full capacity until they have been in normal use for several days.

Running rechargeable batteries right down at least once a week will help them last as long as possible.

The charge capacity of rechargeable batteries will reduce with time as they wear out, so reducing the performance time of the Parent Unit. Eventually they will need to be replaced. New batteries can be obtained from the BT Baby Monitor Helpline **08702 40 47 45**.

Battery low warning
When the batteries are low you will hear an alert warning tone every minute at the Parent Unit and the battery low light will come on.

To silence the alert, press any button on the Parent Unit. You will have 15 minutes of use before the batteries become completely discharged.

If the batteries are completely flat the Parent Unit will switch off and the link light on the Baby Unit will turn red.

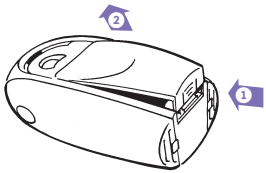
⚠ **WARNING**
Never use non-rechargeable batteries in your Parent Unit. Use only the recommended type – 2 x AA rechargeable (1300mAh NiMH) batteries – using other types could permanently damage your unit.

The Parent Unit can still be used when it is in the charger.

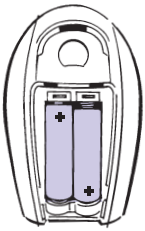
Parent Unit

1. Plug the charger for the Parent Unit into the mains power socket.
2. Remove the battery compartment cover and insert 2 x AA rechargeable batteries into the battery compartment on the Parent Unit and replace the battery compartment cover as shown. You should always ensure you have inserted batteries in the Parent Unit.

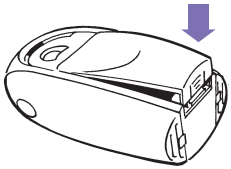
a.



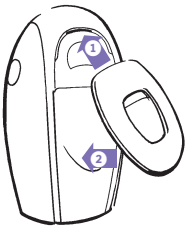
b.



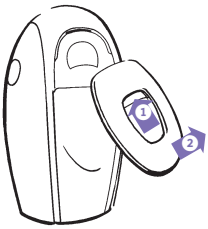
c.



3. Slot the Parent Unit into the charger, the red charging light comes on. Charge the batteries for 16 hours before switching on the Parent Unit.
4. For added convenience, attach the belt clip.



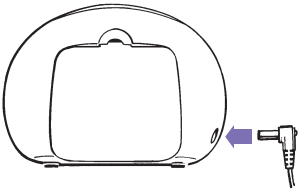
To remove the belt clip
Push on the belt clip tab with your thumb (1), then lift the belt clip off (2).



Baby Unit

Once your Parent Unit has been fully charged:

1. Plug the mains power cable into the socket marked on the side of the Baby Unit. Connect the other end to the mains power and switch on.



⚠ WARNING
Use only the mains power adapter supplied. Using an incorrect adapter may permanently damage the Baby Monitor.

Using batteries

Your Baby Unit also works on battery power, so that you can use it even when you are not near to a mains power socket or during a power cut.

1. Using your finger or a coin, turn the battery lock on the back of the Baby Unit anti-clockwise so the groove is horizontal then lift off the cover.

2. Insert 4 x AA Alkaline batteries (not supplied) as shown.
3. Replace the battery cover, turning the battery lock into the vertical position again to lock it.

Please note
The Baby Unit will only work from the batteries if the mains power is off or disconnected.

Battery performance
The recommended batteries are 4 x AA Alkaline (2500mAh).

With new batteries, your Baby Unit will give up to 24 hours continuous performance with the night lights switched off. This will be less if the lights are switched on.

When the Baby Unit is not being used and is disconnected from the mains power, you should ensure you remove the batteries. This will prevent the batteries discharging.

Check the connection

When both Units are switched on, the green link lights on both Units will come on.

If the link between the Units is broken at any time, the link lights on both units will turn red and flash slowly.

At the Parent Unit, you will also hear an alert signal (3 beeps) to warn you that there is no communication between the Units.

If this happens, check that the mains power is plugged in and switched on at the Baby Unit. Also check that the Units are within range of one another.

In the event of power failure, when the power is restored all your settings will remain unchanged.

Getting to know your Parent Unit

From the Parent Unit you can listen to your baby and operate the Baby Unit by remote control.

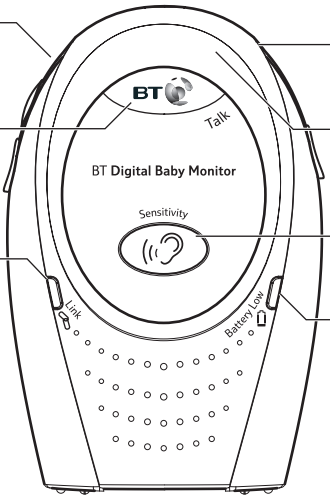
Volume + - / Up and Down
Set volume.
Scroll through the menu options.

Talk
Press to talk to your baby.

Link light
Green when the Baby and Parent Units are linked.

Flashes green when you press Talk or if searching for a link.

Red if the Parent and Baby Units are not linked.

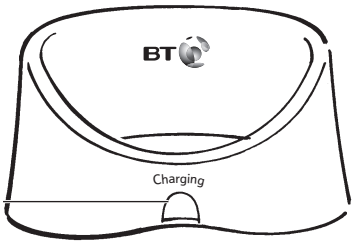


Power on/off
Press and hold to switch the power on or off.

Sound sensitive lights
Green and then red lights indicate the noise level in your baby's room.

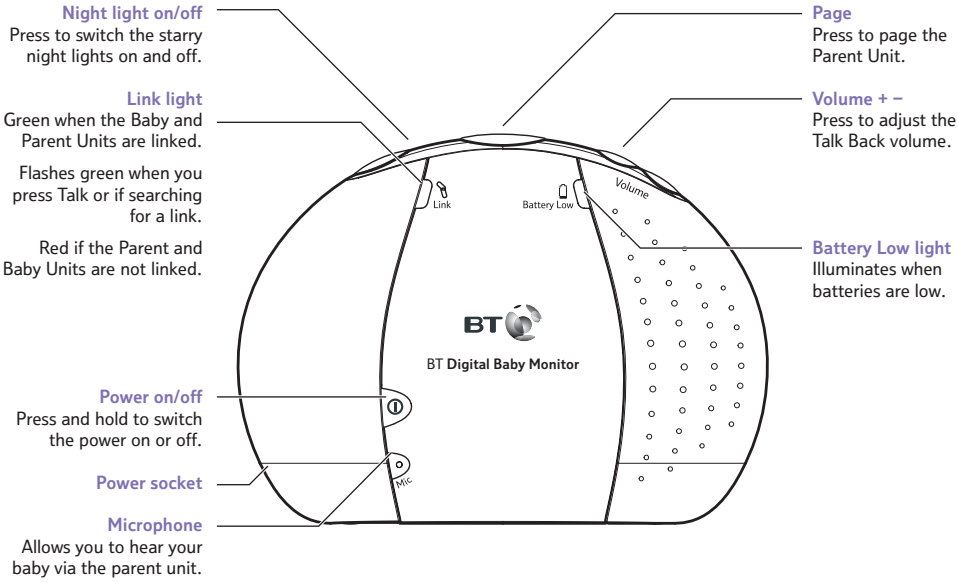
Sensitivity
Press to change the sensitivity level.

Battery Low light
Flashes when the batteries are low.



Charge light
The red light comes on when the Parent Unit is charging.

Getting to know your Baby Unit



Night light on/off
Press to switch the starry night lights on and off.
Link light
Green when the Baby and Parent Units are linked.
Flashes green when you press Talk or if searching for a link.
Red if the Parent and Baby Units are not linked.
Power on/off
Press and hold to switch the power on or off.
Power socket
Microphone
Allows you to hear your baby via the parent unit.

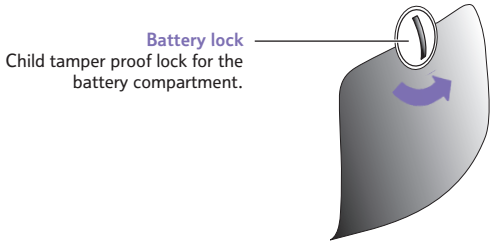
Back of Unit



Using the Baby Monitor

Helpline
If you have any problems using your BT Digital Baby Monitor, call **08702 40 47 45** or email **helpline@btbabymonitors.co.uk**.

Helpline open 9.00am–5.30pm, Monday to Friday and 9.00am–2.00pm on Saturday.

Switching on/off

On both Parent and Baby Units

1. To switch On, press ⏻ until the link light comes on and the display activates. At the Parent Unit the red and green sound sensitive lights illuminate briefly to confirm they are working.

   Or,

   To switch Off, press ⏻ until you hear a beep.

If you place the Parent and Baby Units too close together you will hear a high pitched noise, this is normal. The units are designed to be located at a distance from one another, e.g. in separate rooms.

Adjust volume

There are 5 volume levels on each Unit and there is also an Off setting on the Parent Unit. You cannot switch the volume off on the Baby Unit.

At the Parent or Baby Unit:

1. Press Volume ⊕ to increase or Volume ⊖ to decrease the volume.

   Changing the volume setting on the Baby Unit affects the volume when you use the Talk Back feature.

Talk Back

Whilst using Talk Back you will not be able to hear your baby until you release the BT Talk button.

You can use the Talk Back feature to comfort and reassure your baby.

1. Press *and hold* BT Talk on the Parent Unit to speak to baby.

   The green link lights on both Units flash.

The green link lights flash to indicate one way communication.

2. Release BT Talk to hear your baby again.

Change Talk Back volume

The Baby Unit has 1–5 volume levels.

1. Press ⊕ or ⊖ on the Baby Unit to increase or decrease the volume.

Paging

You can use the Page button on the Baby Unit to find the Parent Unit or alert another member of the family via the intercom.

1. Press Page. The Parent Unit will automatically reset to mid volume and the paging alert will sound.
2. To stop the Page alert, press any button on the Parent Unit, or press Page again on the Baby Unit.

Please note
If you press once you will stop the Paging alert, if you press twice you will open the voice link for you to talk to your baby and your baby will also hear any background noise you make.

Night light

The night light provides a soft and comforting glow for your baby and allows you to check on baby without having to turn on the main room light.

At the Baby Unit:

1. Press the button on the top of the Baby Unit.

   Press again to switch off.

Sound lights

The sound lights are the green and red lights located at the top of the Parent Unit which illuminate according to the level of sound in the baby's room.

This means you can turn the volume off at the Parent Unit and still monitor your baby using the sound lights.

If the Parent Unit senses increased noise levels in your baby's room, the 2nd red light will illuminate and you will hear an alert tone. To stop the alert tone, press any button on the Parent Unit.

The sound alert cannot be set to off. You can set the volume to the lowest level (level 1) if you do not want the sound alert to go off.

Sensitivity

You can change the level of sensitivity to suit your baby. For example, if your baby is a particularly quiet sleeper, you can increase the sensitivity levels so that you are sure to hear if baby disturbs or becomes uncomfortable.

1. Press .
2. Scroll ▲ or ▼ to select the sensitivity level you require – level 1 for low sensitivity, or level 5 for high sensitivity.

Please note
If you set the sensitivity level too low, only louder sounds in the baby's room will be picked up and communicated back to you via the Parent Unit. The Unit will not pick up quieter background noises.

Level 1 – 1 green light
Level 2 – 2 green lights
Level 3 – 3 green lights
Level 4 – 4 green lights
Level 5 – 5 green lights

Help

Helpline
If you have any problems using your BT Digital Baby Monitor, call **08702 40 47 45** or email **helpline@btbabymonitors.co.uk**.

Helpline open 9.00am–5.30pm, Monday to Friday and 9.00am–2.00pm on Saturday.

Power lights do not come on

- If using the mains power adapters make sure they are plugged in and switched on.
- If using batteries, check they are correctly installed and not discharged.

Link light does not come on

- Check that both the Baby and Parent Units are switched on, *see page 8*.
- If using batteries check that they are correctly installed and that they are not discharged.

Link light is flashing green

- If you have pressed BT Talk to use the Talk back feature, the link light will flash to indicate one-way communication between the units.
- The Units are searching for a communication link. Check they are within range of one another and that the mains power (or batteries) are properly connected.

Link light is red

- The link between your Units is broken. You will also hear an alert to let you know there is no communication between the Units. If this happens, check that the mains power (or batteries) is correctly connected and that the Units are within range of one another.

Parent Unit remains silent or very quiet

- The sensitivity setting may be too low, *see page 9*.
- You may have set the volume too low, *see page 8*.

You can hear a high pitched noise

- The Units are too close to each other, or the volume setting is too high, *see page 8*.

Talk back feature is not working

- Check that the volume is loud enough at the Baby Unit, *see page 8*.

General information

Cleaning

Both Units have splash resistant grilles and casing. To clean, wipe with a damp cloth.

Guarantee

Your BT Baby Monitor is guaranteed for a period of 12 months from the date of purchase.

Subject to the terms listed below, the guarantee will provide for the repair of, or at BT's or its agent's discretion the option to replace the Baby Monitor or any component thereof, which is identified as faulty or below standard, or as a result of inferior workmanship of materials. Products over 28 days old from the date of purchase may be replaced with a refurbished or repaired product.

Within the 12 month guarantee period:

If you experience difficulty using the product, prior to returning it, please read the Help section on *page 10* and if necessary call the BT Baby Monitor Helpline on **08702 40 47 45**. They will advise you what to do should you need to return your product.

The conditions of this guarantee are:

- The guarantee shall only apply to defects that occur within the 12 month guarantee period.
- Proof of purchase is required.
- The equipment is returned to BT or its agent as instructed.
- This guarantee does not cover the batteries and any faults or defects caused by accidents, misuse, fair wear and tear, neglect, tampering with the equipment, or any attempt at adjustment or repair other than through approved agents.
- This guarantee does not affect your statutory rights.

R&TTE

This product is intended for use within the UK.

This equipment complies with the essential requirements for the Radio Equipment and Telecommunications Terminal Equipment Directive 1999/5/EC.

Declaration of Conformance

The Declaration of Conformance for the BT Digital Baby Monitor can be obtained by calling the BT Baby Monitor Helpline on **08702 40 47 45** or by emailing **helpline@btbabymonitors.co.uk**.
